Blue Ridge Autism and Achievement Center's mission is to serve children and families who are faced with unique learning challenges, specifically autism and learning disabilities, in and around the Roanoke Valley. BRAAC is a St. Vincent's Home Program.

Autism is a development disability that typically appears within the first three years of life and is marked by significant problems in communication and social relatedness. The result of a neurological disorder, autism hinders the proper development of the brain. More than one million individuals in the United States alone live in the world of autism. It is more prevalent than down syndrome, cystic fibrosis or multiple sclerosis. It is increasing at an alarming rate of 10-17% per year!

A learning disability is a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell or do mathematical calculations. This term includes

such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia and developmental asphasia. According to the CDC, 4.6 million children ages 3-17 have a learning disability.

Thanks again for supporting us in 2018!
